1 Legal status and principal activities

Fendigo BV ("the Company") is a company incorporated in Netherlands in 2000 and is engaged in the marketing and distribution of veterinary pharmaceuticals and animal health products in Netherlands.

2 Significant accounting policies

2.1 Basis of accounting and preparation of financial statements

The Financial Statements have been prepared on accrual basis under the historical cost convention except for certain categories of fixed assets that are carried at revalued amounts.

The financial statements of Fendigo BV ("the Company") have been prepared, in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015.

2.2 Tangible fixed assets

Fixed assets are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets comprise its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than the subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets to the date the asset is ready for its intended use. Exchange differences arising on restatement/settlement of long-term foreign currency borrowings relating to acquisition of depreciable fixed assets are adjusted to the cost of the respective assets and depreciated over the remaining useful life of such assets. Subsequent expenditure relating to fixed assets is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

2.3 Impairment of assets

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists. The following intangible assets are tested for impairment in each financial year even if there is no indication that the asset is impaired:

- (a) an intangible asset that is not yet available for use; and
- (b) an intangible asset that is amortised over a period exceeding ten years from the date when the asset is available for use.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognised for such excess amount. The impairment loss is recognised as an expense in the Statement of Profit and Loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognised.

2.4 Revenue recognition

a) Sale of products

Revenue from sale of products is presented in the income statement within Revenue from operations. The Company presents revenue net of indirect taxes in its statement of profit and loss. Sale of products comprise revenue from sales of products, net of sales returns, rebates, incentives and customer discounts.

Revenue is recognized when it is probable that future economic benefits will flow to the Company and these benefits can be measured reliably. Further, revenue recognition requires that all significant risks and rewards of ownership of the goods included in the transaction have been transferred to the buyer, and that Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold. Performance obligations are satisfied at one point in time, typically on delivery. Revenue is recognized when the Company transfers control over the product to the customers; control of a product refers to the ability to direct the use of, and obtain substantially all of the remaining benefits from, that asset. The majority of revenue earned by the Company is derived from the satisfaction of a single performance obligation for each contract which is the sale of products.

Sales are measured at the fair value of consideration received or receivable. The amounts of rebates/incentives based on attainment of sales targets is estimated and accrued on each of the underlying sales transactions recognised. Returns and customer discounts, as described above, are recognized in the period in which the underlying sales are recognized. The amount of sales returns is calculated on the basis of management's best estimate of the amount of product that will ultimately be returned by customers. The amount recognized for returns is estimated on the basis of past experience of sales returns.

b) Services

Income from technical service, support services and other management fees is recognised when the services are completed as per the terms of the agreement and when no significant uncertainty as to its determination or realisation exists.

c) Interest and dividend income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Dividend income from investments is recognised when the Company's right to receive payment has been established.

2.5 Employee benefits

Short term employee benefits are accrued based on the terms of employment when services are rendered by the employees and charged as an expense to the statement of profit and loss.

Leave balances standing to the credit of the employees that are expected to be availed in the short term are provided for on full cost basis.

2.6 Foreign currency transactions

Initial recognition

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement at the Balance Sheet date

Foreign currency monetary items of the Company outstanding at the Balance Sheet date are restated at the period-end rates. Non-monetary items of the Company are carried at historical cost. Revenue and expenses are translated at the average exchange rates prevailing during the period.

Treatment of exchange differences

Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the statement of profit and loss.

2.7 Taxes on income

Income Tax comprises the current tax provision. Current tax is the amount of tax payable on the taxable income for the period.

2.8 Earnings per share (EPS)

In determining the Earnings per share, the Company considers the net profit after tax. The number of shares used in computing Basic Earnings per share is the weighted average number of equity shares outstanding during the year. The number of shares used in computing Diluted Earnings per share comprises the weighted average number of equity shares considered for deriving Basic earnings per share and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period unless issued at a later date.

2.9 Provisions and contingencies

A provision is recognized when the Company has a present legal or constructive obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Contingent liabilities are not recognized but are disclosed in the notes to financial statements.

2.10 Use of estimates

The preparation of the financial statements in conformity with the Accounting Standards generally accepted in India requires that the Management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Management believes that the estimates used in preparation of financial statement are prudent and reasonable. Actual results could differ from those estimates and the estimates are recognised in the period in which the results are known/materialise.

2.11 Segment

Segments have been identified taking into account the nature of operations, the differing risks and returns, the organizational structure and the internal reporting system.

2.12 Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

2.13 Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

2.14 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities are segregated based on the available information.

2.15 Cash and cash equivalents (for purposes of cash flow statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.16 Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

Notes to the financial statements for the year ended 31 March 2024

All amounts are in Euros unless otherwise stated

20 Reconciliations of tax expenses and details of deferred tax balances**A) Income tax expense recognised in the statement of profit and loss**

	Year ended 31 March 2024	Year ended 31 March 2023
i) Income tax expense recognised in the statement of profit and loss		
Current tax	134,371	70,253
Total (I)	134,371	70,253

The current tax is calculated using tax rates that have been enacted or substantively enacted by the end of each reporting period.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of each reporting period.

B) Reconciliation of effective tax rate

The reconciliation between the statutory income tax rate applicable to the Company and the effective income tax rate of the Group is as follows:

	31 March 2024	31 March 2023
Profit before tax	572,293	407,616
Statutory income tax rate	19.00%	19.00%
Tax as per applicable tax rate	108,736	77,447
Differences due to:		
- Disallowed expenses	(25,635)	7,194
Income tax expenses charged to the statement of profit and loss	134,371	70,253
Effective tax rate	23.48%	17.24%

FENDIGO BV
Notes to the financial statements for the year ended 31 March 2024
All amounts are in Euros unless otherwise stated

21 Financial instruments

The carrying value / fair value of financial instruments by categories are as follows:

A)	Carrying value and fair value	
	31 March 2024	31 March 2023
Financial assets		
Measured at amortised cost		
Loans	-	200,000
Trade receivables	137,351	89,212
Cash and cash equivalents	211,527	217,452
Other financial assets	264	1,000
Total	349,142	507,664
Financial liabilities		
Measured at amortised cost		
Trade payables	83,901	60,921
Total	83,901	60,921

The company's principal financial liabilities comprise trade payables and other payables. The main purpose of these financial liabilities is to finance the company's operations. The company's principal financial assets include loans, trade and other receivables, and cash and deposits that derive directly from its operations.

The company is exposed to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the company's exposure to each of the above risks, the company's objectives, policies and processes for measuring and managing risk, and the company's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements

B) Liquidity risk:

Liquidity risk is the risk that the company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The company approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company reputation.

The company has an appropriate liquidity risk management framework for the management of short, medium and long term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate cash reserves, banking facilities and reserve borrowing facilities by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below provides details regarding the contractual maturities of significant financial liabilities as at 31 March 2024 and 31 March 2023:

Particulars	As at 31 March 2024			
	Less than 1 year	1-2 years	2 years and above	Total

C) Capital management

For the purpose of company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity share holders of the company. The primary objective of the company's capital management is to maximise the shareholder value.

The company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The company includes within net debt, interest bearing loans and borrowings less cash and cash equivalents.

	31 March 2024	31 March 2023
Debt (i)	-	-
Cash and bank balances (ii)	211,527	217,452
Net debt (i) - (ii)	(211,527)	(217,452)
Equity attributable to owners of the Company	272,528	424,606
Gearing ratio	NA	NA

(i) Debt is defined as long-term (including current maturity on long-term borrowings), short-term borrowings and judicial recovery

(ii) Other bank balance exclude the bank balance towards unpaid dividend.

(iii) Gearing ratio : Net debt / Equity.

FENDIGO BV
