FOR AND ON BEHALF OF THE BOARD OF DIRECTORS

Ramon Vila Director

Place: Spain Date: 13th May 2025

Fendigo SA

Notes forming part of the financial statements for the year ended 31 March, 2025

Note

1 Legal status and principal activities

Fendigo SA ("the Company") is a company incorporated in Brussels (Belgium) in 1995 and is engaged in the distribution of veterinary pharmaceuticals and animal health products in Benelux region (Belgium, Netherlands and Luxembuorg).

2 Significant accounting policies

2.1 Basis of accounting and preparation of financial statements

The Financial Statements have been prepared on accrual basis under the historical cost convention except for certain categories of fixed assets that are carried at revalued amounts.

'The financial statements of Fendigo SA ('the Company') have been prepared, in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015.

2.2 Tangible fixed assets

Fixed assets are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets comprise its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than the subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets to the date the asset is ready for its intended use. Exchange differences arising on restatement/ settlement of long-term foreign currency borrowings relating to acquisition of depreciable fixed assets are adjusted to the cost of the respective assets and depreciated over the remaining useful life of such assets. Subsequent expenditure relating to fixed assets is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

2.3 Depreciation

Depreciation is provided under the straight-line method based on the useful lives:

Nature of Asset	Useful life in periods (range)	
Computers	3	
Office premises	25	
Vehicles	1 to 5	

2.4 Inventory

Inventories comprises of finished goods. These are valued at the lower of cost and net realizable value. Cost is determined on First in First out basis for finished goods - 'At material cost, conversion costs and an appropriate share of production overheads.

2.5 Revenue recognition

a) Sale of products

Revenue from sale of products is presented in the income statement within Revenue from operations. The Company presents revenue net of indirect taxes in its statement of profit and loss. Sale of products comprise revenue from sales of products, net of sales returns, rebates, incentives and customer discounts.

Revenue is recognized when it is probable that future economic benefits will flow to the Company and these benefits can be measured reliably. Further, revenue recognition requires that all significant risks and rewards of ownership of the goods included in the transaction have been transferred to the buyer, and that Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold. Performance obligations are satisfied at one point in time, typically on delivery. Revenue is recognized when the Company transfers control over the product to the customers; control of a product refers to the ability to direct the use of, and obtain substantially all of the remaining benefits from, that asset. The majority of revenue earned by the Company is derived from the satisfaction of a single performance obligation for each contract which is the sale of products.

Sales are measured at the fair value of consideration received or receivable. The amounts of rebates/incentives based on attainment of sales targets is estimated and accrued on each of the underlying sales transactions recognised. Returns and customer discounts, as described above, are recognized in the period in which the underlying sales are recognized. The amount of sales returns is calculated on the basis of management's best estimate of the amount of product that will ultimately be returned by customers. The amount recognized for returns is estimated on the basis of past experience of sales returns.

b) Interest and dividend income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Dividend income from investments is recognised when the Company's right to receive payment has been established.

2.6 Employee benefits

Short term employee benefits are accrued based on the terms of employment when services are rendered by the employees and charged as an expense to the statement of profit and loss.

Leave balances standing to the credit of the employees that are expected to be availed in the short term are provided for on full cost basis.

2.7 Foreign currency transactions

Initial recognition

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement at the Balance Sheet date

Foreign currency monetary items of the Company outstanding at the Balance Sheet date are restated at the period-end rates. Non monetary items of the Company are carried at historical cost. Revenue and expenses are translated at the average exchange rates prevailing during the period.

Treatment of exchange differences

Exchange differences arising on settlement / restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the statement of profit and loss.

2.8 Taxes on income

Income Tax comprises the current tax provision. Current tax is the amount of tax payable on the taxable income for the period.

2.9 Earnings per share (EPS)

In determining the Earnings per share, the Company considers the net profit after tax. The number of shares used in computing Basic Earnings per share is the weighted average number of equity shares outstanding during the year. The number of shares used in computing Diluted Earnings per share comprises the weighted average number of equity shares considered for deriving Basic earnings per share and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the year unless issued at a later date.

2.10 Provisions and contingencies

A provision is recognized when the Company has a present legal or constructive obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Contingent liabilities are not recognized but are disclosed in the notes to financial statements.

2.11 Use of estimates

The preparation of the financial statements in conformity with the Accounting Standards generally accepted in India requires that the Management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Management believes that the estimates used in preparation of financial statement are prudent and reasonable. Actual results could differ from those estimates and the estimates are recognised in the period in which the results are known/materialise.

2.12 Segment

Segments have been identified taking into account the nature of operations, the differing risks and returns, the organizational structure and the internal reporting system.

2.13 Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

2.13 Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan.

2.14 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities are segregated based on the available information.

2.14 Cash and cash equivalents (for purposes of cash flow statement)

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

2.15 Leases

Ind AS 116 supersedes Ind AS 17 Leases, including Appendix A of Ind AS 17 Operating Leases-Incentives, Appendix B of Ind AS 17 Evaluating the Substance of Transactions Involving the Legal Form of a Lease and Appendix C of Ind AS 17,

Determining whether an Arrangement contains a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognise most leases on the balance sheet.

The Company adopted Ind AS 116 using the modified retrospective method of adoption with the date of initial application of 1 April 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application

Leases previously accounted for as operating leases

The Company recognised right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets for most leases were recognised based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. In some leases, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application. The Right of Use asset are depreciated on a straight- line basis over the lease term

The Company also applied the available practical expedients wherein it:

- · Used a single discount rate to a portfolio of leases with reasonably similar characteristics
- Relied on its assessment of whether leases are onerous immediately before the date of initial application
- · Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- · Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

2.16 Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

27 Leases

The Company's significant leasing arrangement is mainly in respect of office premises, machinery and equipment; the aggregate lease rent payable on these leasing arrangements charged to Statement of Profit and Loss is (Previous Year).

The following is the movement in lease liabilities:

Particulars	Year ended	Year ended
	31 March 2025	31 March 2024
Opening balance	137,632	185,288
Accretion of interest	7,295	2,284
Addition	124,437	-
Payments	(90,012)	(49,940)
Closing Balance	179,352	137,632
Current	65,784	25,213
Non-current	113,569	112,419

The effective interest rate for lease liabilities is 1.5%, with maturity till 2029

The following are the amounts recognised in profit or loss:

	Year ended	Year ended
	31 March 2025	31 March 2024
Depreciation expense of right-of-use assets	17,552	23,184
Interest expense on lease liabilities	7,295	2,284
Total amount recognised in profit or loss	24,847	25,468

28 Reconciliations of tax expenses and details of deferred tax balances

A) Income tax expense recognised in the statement of profit and loss

A) income tax expense recognised in the statement of profit and loss	Year ended 31 March 2025	Year ended 31 March 2024
i) Income tax expense recognised in the statement of profit and loss		
Current tax	884,010	406,000
Total (I)	884,010	406,000
Deferred tax charge		
Origination and reversal of temporary differences	(866)	701
Total (II)	-866	701
Total (IV = I+II)	883,144	406,701

The current tax is calculated using tax rates that have been enacted or substantively enacted by the end of each reporting period.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of each reporting period.

B) Reconciliation of effective tax rate
The reconciliation between the statutory income tax rate applicable to the Company and the effective income tax rate of the Group is as follows:

	31 March 2025	31 March 2024
Profit before tax	3,457,352	1,654,406
Statutory income tax rate	25.00%	25.00%
Tax as per applicable tax rate	864,338	413,601
Differences due to:		
- Exempted income	(18,806)	6,901
Income tax expenses charged to the statement of profit and loss	883,144	406,701
Effective tax rate	25.54%	24.58%

Notes to the financial statements for the year ended 31 March, 2025

Amounts in Euros (€) unless otherwise stated

The carrying value / fair value of financial instruments by categories are as follows:

A)

	Carrying value	Carrying value and fair value		
Financial assets	31 March 2025	31 March 2024		
Measured at amortised cost				
Loans	•	-		
Trade receivables	1,248,180	1,105,969		
Cash and cash equivalents	1,818,200	1,473,840		
Other financial assets	100	112		
Total	3,066,481	2,579,921		
Financial liabilities				
Trade payables	2,964,628	1,442,637		
Other financial liabilities	65,784	137,632		
Total	3,030,412	1,580,268		

The company's principal financial liabilities comprise loans and borrowings, trade payables and other payables. The main purpose of these financial liabilities is to finance the company's operations. The company's principal financial assets include investments, loans, trade and other receivables, and cash and deposits that derive directly from its operations.

The company is exposed to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the company's exposure to each of the above risks, the company's objectives, policies and processes for measuring and managing risk, and the company's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

Liquidity risk is the risk that the company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The company approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company reputation.

The company has an appropriate liquidity risk management framework for the management of short, medium and long term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate cash reserves, banking facilities and reserve borrowing facilities by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below provides details regarding the contractual maturities of significant financial liabilities as at 31 March 2022 and 31 March 2021:

Particulars		As at 31 March 2025			
	Less than 1 year	1-2 years	2 years and above	Total	
Trade payables	2,964,628	-	-	2,964,628	
Lease Liability	65,784	90,012	23,556	179,352	
Particulars		Asat 31 N	1arch 2024		
	Less than 1 year	1-2 years	2 years and above	Total	
Trade payables	1,442,637	•		1,442,637	
Lease Liability	25,213	27,811	84,607	137,632	

Interest rate risk exposure

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The company's exposure to the risk of changes in market interest rates relates primarily to the company's long-term debt obligations with floating interest rates.

At the reporting date the interest rate profile of the company's interest-bearing financial instruments are as follows:

	31 March 2025	31 March 2024
Financial liabilities		
-Borrowings from bank	*	•
-Borrowings from others	-	

Capital management D)

For the purpose of company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity share holders of the company. The primary objective of the company's capital management is to maximise the shareholder value.

The company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the

capital structure, the company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The company includes within net debt, interest bearing loans and borrowings less cash and cash equivalents

In order to achieve this overall objective, the company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. As at 31 March 2020, there is no breach of covenant attached to the borrowings.

The company manages its capital to ensure that entities in the company will be able to continue as going concerns while maximising the return to stakeholders through the optimisation of the debt and equity balance.

The capital structure of the company consists of net debt (offset by cash and bank balances) and total equity of the company.

The company's gearing ratio at end of each reporting year is as follows:

	31 March 2025	31 March 2024
Debt (i)		_
Cash and bank balances (ii)	1,818,200.48	1,473,839.73
Net debt [(i) - { (ii)+(iii)+(iv) }]	(1,818,200.48)	(1,473,839.73)
Equity attributable to owners of the Company	3,403,493	2,834,380
Gearing ratio	NA	NA

⁽i) Debt is defined as long-term (including current maturity on long-term borrowings), short-term borrowings and judicial recovery.

⁽ii) Other bank balance exclude the bank balance towards unpaid dividend.

⁽iii) Gearing ratio: Net debt / Equity.
